

image-cropper

Crops the given image according to the entered pixel values.

Before

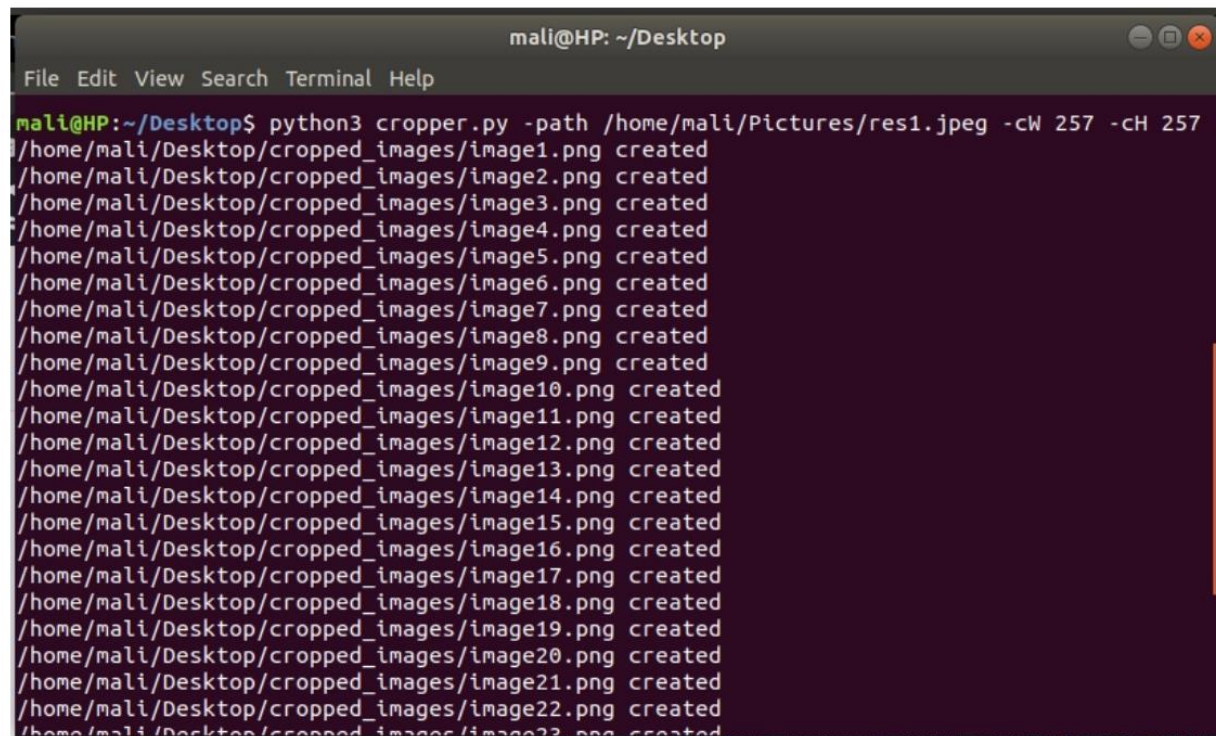

After

Terminal(cmd if you'r in windows) command line

e.g python3 cropper.py -path /home/mali/Pictures/res1.jpeg -cW 257 -cH 257

-path: directory of image that will crop -cW: cropping width value -cH: cropping height value

A terminal window titled 'mali@HP: ~/Desktop' with a menu bar (File, Edit, View, Search, Terminal, Help). The terminal shows the command 'python3 cropper.py -path /home/mali/Pictures/res1.jpeg -cW 257 -cH 257' being executed. The output is a list of 22 image files created in the directory '/home/mali/Desktop/cropped_images/'. The files are named 'image1.png' through 'image22.png'. The terminal has a dark purple background and a vertical orange scrollbar on the right side.
